# Decorative fireplace

It is not always possible to put wood burning fireplaces for various reasons. We offer to use the electric fireboxes in our wonderful tiled fireplaces.

These fireplaces are not attached to the place and don't need a chimney (they can be moved, when you change your furniture). Modern electric fireboxes perfectly simulate a flame, giving heat and even some of them emit steam, creating the illusion of smoke.

Now there are many manufacturers of electric furnaces. We offer "Dimplex" (Ireland), but the choice is yours.
